

## ***BIOTECHNOLOGY STUDENT'S FORUM***

### **AIM OF THE FORUM:**

To inculcate the spirit of scientific quest and discovery, to acquaint and popularize the role of Biotechnology in socio-economic development.

### **KEY OBJECTIVES:**

1. Orientation about the forum.
2. Electing the student coordinators for coordinating with the forum activities.
3. Scheduling eminent speakers facilitating online or in-person interactions with students.
4. Conducting different activities like games, debate, puzzles, quiz as a part of forum activities.
5. Scientific Poster Presentation by M.Sc. students which serves as a visual platform to showcase innovative research and the process of designing a poster can spark new ideas and approaches to research.
6. To effectively schedule alumni speakers to inspire students for sharing current scientific knowledge, create a detailed plan that includes identifying suitable alumni, coordinating schedules and ensuring a positive and impactful experience for both the speakers and students.
7. One of the semesters will be planned for Extension work where PG students will be taken to Government schools in and around Bangalore to perform innovative scientific experiments in the schools. This provides students with practical experiences, enhances their communication skills and promotes community engagement while fostering a love for science among younger students.
